

- We simply don't know enough about autism. To help change that, we invite the entire SPARK community to join a landmark national autism research project called SPARK.
- SPARK is a research partnership that hopes to be the largest of its kind. With more participation, we will be able to obtain answers to the questions we all have about autism. Help us spark better futures for all individuals and families affected by autism.
- Individuals with a professional diagnosis of autism and their family members will be asked to share information about their medical and family history, as well as provide a saliva sample for DNA collection. Cincinnati Children's Hospital staff will be available to assist families with their SPARK enrollment and saliva collection process.
- In appreciation of your participation in SPARK, SFARI will provide a gift card via email of up to \$50 for biological trios after the sample is received by the study team.
- The value of this study depends upon having DNA from the person with autism and both of his or her biological parents. We encourage all available family members to attend.

**Date and time: April 10, 2017 8am-5pm**

**Event location: 3430 Burnet Avenue 5<sup>th</sup> floor Room 5.201**

**Supervised play area for children and adults**

**Resource tables**

**QUESTIONS? Call [513-636-0523](tel:513-636-0523) or email [autism@cchmc.org](mailto:autism@cchmc.org)**
