

Family Support Meeting Goals:

- To provide a comfortable, confidential forum for those family members touched by Autism Spectrum Disorder (ASD) to discuss the issues associated with these neurological conditions and identify the resources available to help address these issues.
- To network with other family members touched by. The concept behind this forum is for family members to recognize they are not alone, develop relationships with others in similar situations, and learn there is support for them in our community.
- To help support family members dealing with issues such as new diagnosis, school issues, challenging behaviors, transitions and living with a loved one diagnosed with ASD across the lifespan - Preschool-aged through Adulthood.
- To share, identify, explore, and promote awareness of resources, information, seminars, workshops, and community activities to assist family members with the challenges of living with a loved one diagnosed with ASD.
